

Content Access

Begin Your Journey to Web3

- A Web3 system providing instant personalization and dynamic web experiences, instantly through the cloud
- ContentAccess enables organizations all over the world to provide new and dynamic value across their web presence
- Virtualize your navigation with zero source code footprint
- Instant pathway to engaging, interactive user experiences

Deliver Content and Virtualized Navigation at the Speed of Web3

INJECT

Inject code directly from the cloud to unlimited pages

DETECT

Detect individual profiles, interests and preferences

DELIVER

Deliver web content in minutes, not months

DECOUPLE

Decoupled navigation transforms websites from Web2 to Web3

ELIMINATE SILOS

Complicated menus and content overload leave visitors frustrated, fatigued, and confused. ContentAccess allows interactive pathways to be added anywhere in your web enterprise to optimize user experience across online properties.

FUNNELS & RE-TARGETING

Delivering visitors to their destination requires a lot of forethought. ContentAccess provides agility to implement online marketing funnels and re-target content based on visitor preferences or your enterprise goals.

VIRTUALIZED NAVIGATION

Every website's navigation is trapped within its source code and domain. Virtualized navigation replaces hard-coded links with dynamic and personalized access points to content enabling your users to easily find what they are looking for.

CONTROL THE FLOW

Manage and control user flow and distribution of information to website visitors. By delivering tailored, interactive experiences, guide and engage website visitors, while boosting retention. Position smarter content to drive conversion and reduce bounce rates.
